

Absolutely the best sump on the market today!

Protect your home and family.  
Make your basement dry.  
Create more usable space.

# Advanced Sump design

Welcome to the GrateSump™, an integral component of your new water control system. The GrateSump has several key features that ensure unmatched performance and reliability like no other in the basement industry.

## Performance & Reliability

### Does not promote undermining of the foundation

Traditional sump liners can remove sediment from under the basement footing causing the foundation to weaken.

### GrateSump resists iron and clogging

Large engineered slots on the front two sides of the GrateSump reduces clogging and increases water flow.

### Built in pump stand

Built in pump stand keeps debris away from pump and aids in cleaning.

### Easy on / easy off cover

No screws to lose.

### Dehumidifier drain plug

Connect your dehumidifier to the built-in drain plug.

### Permanent mesh filter

Permanent mesh filter can be cleaned from within the sump housing.

### GrateSump dual combination

GrateSumps can be linked together to add an additional pump or battery back up system.

### Every pump has its own house

Eliminate cords etc. getting tangled in pump switches.

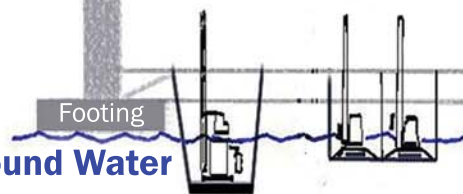

### Virtually air tight cover

Impressive steel like gray plastic cover. Reduces ground humidity from entering basement.

## Compare

Prevent undermining

Typical Sump Liner  
22" to 30" deep

GrateSump  
17" to built in  
pump stand

Typical sump liners are deeper and can remove water from under the foundation that is vital for the stability of the soils supporting the footing.

GrateSumps allow more water into them from under the basement slab while not affecting the zone of influence under the foundation.

Choice & Control

The **GrateSump**<sup>TM</sup>  
deserves a great pump

## FastSump Pump Primary Pump- 1/3 HP

### Features

FastSump Pump is a 1/3HP pump that utilizes a high efficient motor. It uses less amps, which saves on energy costs and provides a longer life to the pump because it runs cooler.

- 1/3 HP Sump Pump
- 2400 GPH
- Permanent Split Capacitor
- Reliable Float Switch w/ bypass switch
- Energy Efficient (Only 4amps)
- Durable Cast Iron
- 3yr Warranty

## For peace of mind- Install a GrateSump Plus - Battery Backup System

### System Advantages

For added protection and peace of mind, install the GrateSump Plus<sup>TM</sup> battery backup sump pump system. If your power goes out, you have a safe operating time until your power is turned back on. A battery back up system should be installed with every primary sump pump system.

### Features

- Primary Sump Pump System with Battery Backup
- 2400GPH with AC or DC Power
- GrateSump - Advanced Sump Pump Liner
- FastSump Pump - 1/3HP Sump Pump
- FastSump Power Inverter 900w Inverter converts 12v DC to 115v AC
- Sealed Battery - 100AH

**GrateSump** Plus

**FastSump**<sup>TM</sup> Power Inverter

Grate Products recognizes the FastSump Plus and technology as the right choice. High performance, reliability, strong, dependable, and built to last.

The FastSump Power Inverter Automatically Convert Battery Power Run Your Standard 115V Pump. No Secondary Pump Required.

AC pumps include  
**3** year  
warranty
